(825)-419-4017 | basvi20chunara@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Computing Science student with hands-on experience in data analytics, financial data analysis, and stakeholder presentations. Skilled at translating complex data into clear, actionable insights for business decision-makers. Proficient in SQL, Python, Excel, and Power BI with proven ability to deliver quality-focused analytical solutions.

SKILLS

Languages & Databases: Python, R, SQL (MySQL, PostgreSQL, SQLite), Java, JavaScript, C

Analytics & BI: Excel, Power BI, Tableau, DAX, Data Analysis, EDA, KPI Reporting, Pandas, NumPy, Seaborn

Tools & Methods: Git, GitHub, Linux, Agile, Postman, ETL, Data Cleaning, Data Validation

PORTFOLIO PROJECTS

Retail Banking Dashboard (Power BI Project)

- Designed and developed a **4-page interactive Power BI** dashboard analyzing 50K+ customer records across loan exposure, deposit behaviour, credit balances, and customer risk segments.
- Performed **end-to-end** data analysis using Python (Pandas, Seaborn) to clean data, conduct EDA, and identify customer trends; developed **DAX** measures for financial KPIs including total loan, deposits, credit card balance, and business lending; implemented cross-page navigation and interactive reporting features.
- Created a production-style analytics dashboard that transformed raw financial data into clear **KPI insights**, demonstrating end-to-end BI workflow from data preparation to visualization and business recommendations.

Airbnb Global Performance Dashboard (Power BI Project)

- Designed and developed a multi-page **Power BI** dashboard analyzing Airbnb market performance, guest ratings, and host trends across global cities using **DAX** and structured datasets containing 33+ attributes. Monitored and validated data feeds from MySQL source tables, managing data quality checks across banking client and customer datasets to ensure consistency and reliability for downstream reporting.
- Developed **KPI reporting** visuals and interactive dashboards to identify pricing inefficiencies, host trust patterns, and customer satisfaction trends across multiple markets.
- Translated dashboard findings into 5 actionable business recommendations covering host trust, pricing strategy, cleanliness improvement, and seasonal demand patterns, demonstrating end-to-end data storytelling for non-technical stakeholders.

WORK EXPERIENCE

Coding Instructor (Part-time)

Oct 2025 – Present

Code Ninjas

- Instruct foundational and advanced programming (JavaScript) to students ages 5–15 through games and interactive projects, building real-world application development skills. Guide students through structured debugging, algorithmic thinking.

Data and Metrics Lead Volunteer (On-Call)

Aug 2025 – Present

Orfe EcoArt Program

- Develop and automate KPI dashboards using Google Sheets, Big Query and Vanna AI to support operational reporting and decision-making. Perform data validation and quality checks to improve reporting accuracy and maintain dataset integrity.
- Gather reporting requirements from the founder and iteratively improve dashboard workflows to support operational decision-making and reporting efficiency.

Digital Marketing Analyst Intern

May 2025 – Aug 2025

Vosyn

- Conducted data mining on user engagement and behavioral datasets to support campaign optimization and strategic marketing decisions. Presented campaign performance insights and trend analysis to stakeholders, translating complex data into clear, actionable recommendations.
- Conducted competitor and market data analysis to contribute to the Go-To Market Strategy of the company.

EDUCATION

University of Alberta (Bachelor of Science)

Edmonton, AB

Specialization: Computing Science – 4th year

Sep 2023 – June 2027

Coursework: Database Management, Software Engineering, Modern Web Architecture, AI, ML

Awards: University of Alberta Regional Excellence & International Admission Scholarship
