## PROFILE SUMMARY

Fourth-year Computing Science student at the University of Alberta with experience in data analysis, database administration, and business intelligence. Skilled in Python, SQL, and Power BI, with hands-on experience in data preparation, validation, exploratory analysis, and KPI reporting. Familiar with machine learning and AI concepts, with experience translating data-driven findings into actionable business recommendations and documenting technical processes.

## SKILLS

**Programming & Data:** Python (Pandas, NumPy), SQL (MySQL, PostgreSQL, SQLite), R, SSRS
**Data Analytics:** Data Cleaning, Data Validation, Exploratory Data Analysis, Statistical Analysis, Data Modeling
**BI & Reporting:** Power BI, DAX, KPI Reporting, Excel, Tableau, Data Visualization
**AI & Machine Learning:** Machine Learning Fundamentals, AI/LLM Concepts
**Tools & Technologies:** Git, GitHub, Linux, Microsoft Office Suite, Google Cloud Platform

## PORTFOLIO PROJECTS

### Retail Banking Analytics Dashboard (Power BI Project)

• Designed and developed a **4-page interactive Power BI** dashboard analyzing **3000** customer records across loan exposure, deposit behaviour, credit balances, and customer risk segments.
• Built an end-to-end analytics workflow using **Python** (Pandas, Seaborn) to clean financial data, conduct EDA, and identify customer trends; developed **DAX** measures for financial KPIs including total loan, deposits, credit card balance, and business lending; implemented cross-page navigation and interactive reporting features.
• Created a production-style analytics dashboard that transformed raw financial data into clear **KPI insights**, demonstrating end-to-end BI workflow from data preparation to visualization and business recommendations.

### Airbnb Global Performance Dashboard (Power BI Project)

• Developed a 3-page interactive **Power BI report** analyzing Airbnb listing inventory, host quality, guest ratings, and review behaviour across global cities using two **CSV** data sources.
• Built **KPI cards**, **DAX-based measures**, and **interactive visualizations** to compare listing growth, pricing, guest ratings, host verification, and monthly review trends across cities.
• Translated dashboard findings into 5 actionable business recommendations covering host trust, pricing strategy, cleanliness improvement, and seasonal demand patterns, demonstrating end-to-end data storytelling for non-technical stakeholders.

## WORK EXPERIENCE

**Data Analysis and Administration Intern** Sep 2026 – Present
**City of Edmonton**
• Support database administration, monitoring, troubleshooting, and maintenance across SQL Server and Oracle environments, contributing to reliable operation of corporate database systems.
• Use SQL and Python to query, structure, and analyze technical datasets, supporting investigation of database issues and infrastructure-related requirements.
• Assist with database configuration and infrastructure projects while developing and maintaining technical, procedural, and operational documentation in collaboration with project teams.

**Digital Marketing Analyst Intern** May 2025 – Aug 2025
**Vosyn**
• Collaborated with stakeholders to analyze user engagement data, identify trends, and translate business requirements into actionable recommendations. Presented campaign performance insights and trend analysis to stakeholders, translating complex data into clear, actionable recommendations.
• Conducted competitor and market data analysis to contribute to the Go-To Market Strategy of the company.

## EDUCATION

**University of Alberta (Bachelor of Science)** Edmonton, AB
**Specialization:** Computing Science – 4th year Sep 2023 – June 2028
**Coursework:** Database Management, Digital Image Processing, Software Engineering, Modern Web Architecture, AI, ML
**Awards:** University of Alberta Regional Excellence & International Admission Scholarship
